

# **ROUNDSS**® **Industrial Rotary Encoder**

#### PRODUCT CATALOG

# ROUNDSS ® Industrial Rotary Encoder

Founded in 2006, Changchun Rongde Optics Co., Ltd locating in the optical industry base Changchun, is one of the leading manufacuters of rotary encoders and other related products for speed and angle measurement in industrial automation industry. With 5 subsidiaries in Guangzhou, Wuxi, Shanghai, Beijing and Xi'an as well as more than 30 representative offices around China, and multiple distributors abroad, like Russia, Germany, India, USA, Roundss maintains a presence all around the world.

Roundss with multiple kinds of independent intellectual property rights, has more than 130 employees, including 30 engineers. The 5% of the turnover is invested to product development. As the national high-tech enterprise, Roundss made outstanding contributions to national key projects.

Customer requirement, innovative technology as well as missionary focus, which has been built up over years, all form the basis of Roundss brand and first class products and make Roundss in the front rank of encoder industry. With the encoders production volume 200,000 pcs in 2013, Roundss worked with many global customers, such as FANUC, Bosch, Siemens.

The encoder automatic assembling line was introduced in 2012 for an efficient production. It succeeded in 2015 after the vast energy investment. A new factory with 10000 sq will be finished in 2016, together with the formal use of automatic assembling line, which is the guarantee of our 1,000,000 pcs production target per year.

### **Company Appearance**

#### The high quality products

are ensured by advanced automation assembling lines technology, dust-free factory, first -class testing equipments. All encoders will be strictly tested according to industrial standard before leaving factory, including high-low temperature test, aging test, fatigue test, accuracy test to assure the reliability and stability of encoders.

**Technical Office** 

**Factory** 

Changchun Rongde Optics Co.,Ltd

#### **Overseas Market**

Roundss has participated in numerous international exhibitions to present our innovative products and superior services in front of the world since 2012. Through the constant and active effort of Roundss staff, our products will be approved by more people.

**Automation World-Seoul**

#### **Position and Motion Sensors**

ABSOLUTE ENCODER

INCREMENTAL ENCODER

MANUAL PULSE GENERATOR

MAGNETIC RING ENCODER

OPTICAL BEARINGLESS SPINDLE ENCODER

SERVO MOTOR ENCODER

DIGITAL CODE ROTARY SWITCH

GEAR TOOTH ENCODER
DRAW WIRE SENSOR

FLEXIBLE COUPLING

LINEAR SCALE & DIGITAL READOUT

LENGTH GAUGE

### **Absolute Encoder**

#### **TECHNOLOGIES:**

- · Singleturn and multiturn encoders
- Photoelectric sensing technology adopted to ensure high accuracy
- · Absolute multiturn encoders with mechanical gear or electronic multiturn stage
- Integrative technology
- Multiple interfaces: SSI, MODBUS, Canopen, parallel or analogue
- Multiple mounting options

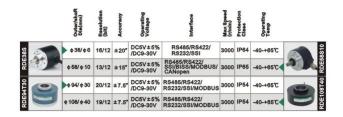

#### **Applications:**

Aerospace; Radar; Robotic; Military industry; Gears & motors; Wind power

#### Single-turn Absolute Encoder

#### Multi-turn Absolute Encoder

Nonmagnetic absolute encoders and customized encoders are available.

Please find the details on website.

### Incremental Encoder

#### Versatile, compact and flexible Incremental encoders

- Photoelectric sensing technology adopted to ensure high accuracy
- · High precision heavy duty bearing for a long lifetime
- Frequency response up to 400kHZ
- Universal mounting dimensions
- High resolution up to 180000 lines on request

Incremental rotary encoders can be used in all applications that require monitoring rotation rate, speed, acceleration and direction.

Lift; Textile Machines; CNC Machine Tools; Packing Machines; Conveyor Industry

#### Solid Shaft Encoders

#### End/Through Hollow Shaft Encoders

Nonmagnetic incremental encoders and customized encoders are available. Please find the details on website.

### **Manual Pulse Generator**

MPG is applicable to CNC machines by providing HOME position, step adjustment and interrupt signal.

- Precise 90°phase of A and B signals to ensure accurate position control
- · Oil and dust proof, and water resistant
- Standard 3 meter spiral cables get through 500,000-1000,000 times stretching test
- Compatible with SIEMENS, FANUC, GSK, Mitsubishi systems

# **Magnetic Ring Encoder**

- · Applicable to CNC machine tools.
- Noncontact measurement.Long life.
- · With the same advantage as integrated encoder.
- · High protection class IP65.
- . No need to change the original construction of machine tools when mounting.
- · Mount it at the position of original synchronous pulley.
- · Mount readhead and ring seperately.

	Outer Dia./ Max Hole(mm)	Resolution (ppr)	Interface	Output Signal	Operating Voltage	Max Speed (r/min)

### Optical Bearingless Spindle Encoder

- · Applicable to CNC machine tools
- Bearingless design for prolonging service life; Low failure rate, stable and reliable;
   Optical structure with high anti resistance; Higher vibration resistance.
- Adjustable axial mounting range; Easy Mounting without aid of mounting accessory.
   Low maintainance cost; Stable installation construction.
- The processing efficiency of machine tools increased (10000rpm).
   Completely synchronous with machine tool spindle without synchronous pulley.

	Outer Dia./ Max Hole(mm)	Resolution (ppr)	Interface	Output Signal	Operating Voltage	Max Speed (r/min)

### **Servo Motor Encoder**

Servo motor encoder is mounted to servo motor to measure the position of magnetic poles, and report angle and speed information of motor.

- Ultra-thin design
- · Straight shaft and taper shaft are optional
- With high sensitive photosensitive components, high frequency response
- · Square wave and RS485 output with UVW signals
- Max resolution to 32 bit

	Outer/shaft Dia.(mm)	Resolution	Operating Voltage	Interface	Output Signal	Max Speed (r/mln)	Protection Class	Operating Temp

### **Digital Code Rotary Switch**

Rotary switch with multiple switching functions are applicable to the machine tool's operation panel for axis selection, feed rate and override, etc.

- · Solid metal housing and clear graduation
- 15, 30, 13.85 degrees for options
- · With firm and skid-proof shafts
- Including inhibit and parity signal to avoid error occurrence
- Metal (Gold) coating contact points for stable and highly effective performance
- · Waterproof design (IP65) and built-in O-ring
- . Design for easy installation
- Saving wiring operation and input signal point

	Digital Code	Starting Position	End Position	Goar Angle	Connection Type
NG.	Hexadecimal Code/ Binary Cyclic Code	*, 0-	*, 0-	13.85/15/ 30/20/27.69	Vertical Plug Horizontal Plug

#### Gear Tooth Encoder

Standard gear: 128 gears and 256 gears are available. The sensor is internally biased with a permanent magnet and detects the interaction from an external ferrous gear wheel. And it outputs 1VPP or TTL(RS422 Line Driver) after signal amendment and division.

#### **FEATURES:**

- The non-contact, frictionless design ensures long-term reliability and simple installation
- Direct transmission to avoid the backlash.
- · 0.3mm,0.4mm,0.5mm modules are optional.
- . High frequency response 0-6000KHZ. 1VPP and TTL output signal.
- Compact built-in inductive head applicable to small installation space.
- · High protection class (IP68) for harsh environment.
- · Stable positioning precision of quick drilling and tool change.

	Outer/shaft Dia.(mm)	Resolution (ppr)	Interface	Output Signal	Operating Voltage	Max Speed(r/min)
RDG	φ 39- φ 513 Optional	128-4096	1Vpp/TTL	AA.BB.ZZ.	DC5V	12000

### **Draw Wire Sensor**

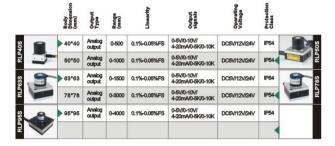

Draw wire displacement sensor is particularly suitable for linear guide systems, hydraulic cylinder system, testing machines, telescopic system, storage location positioning, pressure machinery, paper machinery, textile machinery, sheet metal machinery, packaging machinery, printing machinery, level control device, construction machinery and other related dimensional measurement and position control. Draw wire sensor is of low-cost but high-precision, which can replace optical grating encoder.

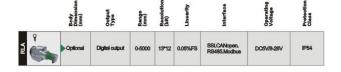

#### Incremental Type Draw Wire Sensor

#### Analog Type Draw Wire Sensor

#### Multi-turn Absolute Type Draw Wire Sensor

# **Flexible Coupling**

Coupling is a mechanical part, used to connect two different shafts (drive shaft and the driven shaft) to rotate together to transmit torque.

In the high-speed heavy-duty power transmission, some couplings also have the functions of cushioning, vibration and improving the dynamic performance of shafting. Composed by two coupling halves, respectively, with the drive shaft and the driven shaft coupling.

Most of the general power machine connects with the machine by means of couplings.

	Туре	Outer Dia. (mm)	Length (mm)	Standard Bore(mm)

### **Linear Scale**

A linear encoder is a sensor, transducer or readhead paired with a scale that encodes position.

The sensor reads the scale in order to convert the encoded position into an analog or digital signal, which can then be decoded into position by a digital readout (DRO) or motion controller.

Linear scales are widely used on lathe, milling machine, grinding machines.

	MesuringRange(mm)	) Resolution	Operating Voltage	Interface	
Σ.	1000-3000	1u/5u	DC5V/8-26V	TTL,RS422	S S
2	0-1000	1u/5u	DC5V/8-26V	TTL,RS422	~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

# **Digital Readout**

A digital readout (DRO) is a display unit which reads the signals generated by the linear encoder (or less frequently by rotary encoders) installed to several machine axes, used to display the position, speed and angle of workpiece (milling and the like) or tool (lathes and grinders).

Body Dimension	Display Range	Axis No	Display Mode	Operating Voltage	Interface
26.5*18cm	8LED	2/3	Digital	AC110~240V	TTL square wave

# **Length Gauge**

Length gauge is a high-precision macro-measuring instrument for many industrial applications and testing organizations.

Following the Abbe principle and high-precision linear gratings measuring standard, it is designed to ensure the best mechanical and thermal stability.

Length gauge is widely used in a variety of applications, including precision workpiece detection, multi-point detection, measuring equipment monitoring and position measurement.

RDC	Measuring Range	Operating Voltage	Resolution
꿆	0-16.8mm	DC5V±5%	1u
